

**Activity: Create a poem of  
love and thanks.**

Reflect on the generosity and bravery of people who came to London to work in the service and caring professions. Write your expressions of gratitude around the curves of the rainbow.

In the ceiling of St Paul's Cathedral there are some beautiful circular mosaic designs, with details that tell important stories.

There are so many people, from different nations, in our society today who are showing love by caring for us and helping us.

They came to join our community after WWII to help rebuild our city and provide new services for the population.

This design is dedicated to each one of them, expressing our thanks and our love.
